

ARRI STUDIO 2000

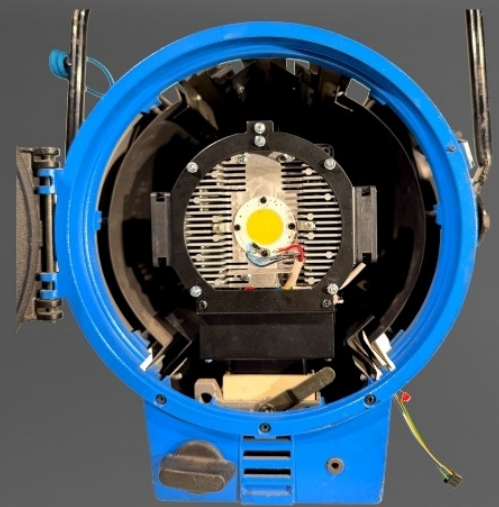

HPLED AR is a LED retrofit solution that allows you to upgrade your ARRI STUDIO 2000 Fresnels by replacing traditional bulbs.

VARI- WHITE CCT TECHNOLOGY WITH A RANGE FROM 3000°K CRI 96 TO 5700°K CRI 94

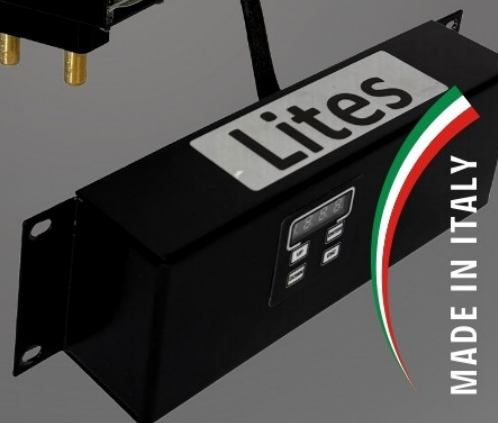

3000°k

5700°k

Immediate energy reduction: thanks to the HP LED AR kit the average energy reduction is of approximately 85% compared to the traditional lamp.

- Tunable white from from 3000°K CRI 96 to 5700°K CRI 94 color temperature
- Dimming - dimming control through the 8 or 16 bits DMX control, adjustment of the reaction times, quick reaction, dimming curves, always with a uniform and smooth operation, without jumps even at the lowest light level, RDM control)
- Flickerfree Operation
- Voltage Input 100-240 V, 50/60 Hz, auto-setting
- Power Consumption 180W
- Data Connection In and Out DMX 5 pin locking XLR connectors
- Thermal protection YES
- Cooling (efficient and silent cooling, possibility to adjust the fan speed)

MADE IN ITALY
